

## Product Specification: Maxam - Telescopic Platforms

Hussey Seatway Ltd

### Description

The Maxam telescopic platform is a traditional bleacher style retractable seating system designed for use in sporting facilities. The layout of the systems can be customised to meet the ongoing and ever changing requirements of sporting venues whilst still maximising capacity.

The Maxam bleacher provides a tiered seating structure to enhance the audience experience. The injection moulded court side bench is typically specified on the system, mainly due to the strength, comfort and low maintenance it offers. Alternatively wooden or upholstered benches can be supplied in place if required.

The Maxam retractable platform is a proven, reliable and safe system that is quick and efficient to operate at the touch of a button.

#### Types:

**Fixed** - Wall and floor attached.

**Recessed** - Recessed into wall space.

**Mobile** - Mobile units for fully flexible positioning.

### Applications

Maxam Telescopic platforms are designed and engineered to meet the seating needs of a wide variety of applications and venues that require both seated spectators and the multi-purpose use of floor space.

For example;

- Sports Halls
- Arenas
- Multi purpose venues
